# Granby CARBON REDUCTION PLAN

## OUR COMMITMENT TO ACHIEVING NET ZERO

# GRANBY MARKETING SERVICES IS COMMITTED TO ACHIEVING:

# INET ZERO EMISSIONS BY 2050

Granby

### BASELINE EMISSIONS FOOTPRINT

### **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

### **BASELINE YEAR: 2020**

### Additional Details relating to the Baseline Emissions calculations.

The carbon footprint has been measured and reported on to attempt to understand how much greenhouse gas is emitted by various activities and parts of the business and to allow us to look at managing these activities to reduce the footprint throughout these activities and areas.

Due to the commercial nature of the business comparative reports may not necessarily progress in reducing the carbon footprint if this figure alone is used in the future. Additionally, due to the unique circumstances of 2020, in terms of furlough and covid, this figure can not be used to give an indication as to carbon produced during less disruptive times.

### **BASELINE YEAR EMISSIONS**

EMISSIONS	TOTAL (TCO2E)	
SCOPE 1	10.232	
SCOPE 2	0.03938	
SCOPE 3 (INCLUDED SOURCES)	UNAVAILABLE	
TOTAL EMISSIONS	10.271	

### **CURRENT EMISSIONS REPORTING**

**REPORTING YEAR: 2020** 

EMISSIONS	TOTAL (TCO2E)
SCOPE 1	10.232
SCOPE 2	0.03938
SCOPE 3 (INCLUDED SOURCES)	UNAVAILABLE

### **EMISSIONS REDUCTION TARGETS**

10.271

To continue our progress to achieving **Net Zero**, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 6 tCO2e by 2025.

This is a reduction of 40%

**TOTAL EMISSIONS** 

### **CARBON REDUCTION PROJECTS**

### **Completed Carbon Reduction Initiatives**

The following environmental management measures and projects have implemented since the 2020 baseline. The carbon emission reduction achieved by these schemes equate to 1 tCO2e, a 10% reduction against the 2020 baseline and the measures will be in effect when performing any contracts under the framework.

Liaison with energy management suppliers over introduction of new technology to increase use of sustainable energy and power

In the future we hope to implement further measures such as:

- Measurement of Scope 3 footprint
- Carbon neutral despatches

### **DECLARATION AND SIGN OFF**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### SIGNED ON BEHALF OF THE SUPPLIER

**Managing Director** 

Joanne Limber
